

# GRASMERE COURT CASE STUDY

## WHO ARE GRASMERE COURT HOTEL?

Grasmere Court Hotel is a family run independent guest house based in the historic town of Keynsham within easy reach of both Bath and Bristol.

## THE CHALLENGE

An aging wifi system meant that the signal throughout Grasmere Court was hit and miss, with some rooms having excellent internet connectivity and others having none at all. Recognising that internet is a key consideration for many travellers when choosing somewhere to stay, Systemagic were called in to provide a solution.

## THE SOLUTION

Systemagic worked around a challenging building layout to run modern data cabling to various parts of the hotel which were previously left without any internet access at all. Installing modern, long range wireless access points, Grasmere Court now boasts wireless internet in every bedroom as well as all public areas and even the rear terrace garden.

The wifi is remotely managed and monitored by Systemagic, who can make changes, spot any troublesome clients and even reboot the system if needed, completely remotely without needing to interfere with the hotel and its guests.

## WHO ARE SYSTEMAGIC?

With over 18 years experience in the industry we pride ourselves on Doing IT Differently. Systemagic has a long history of working with some of the west-country's finest independent hotels and boutique guest houses.

At Systemagic we provide people-focused IT support, cloud and internet services with no long term contracts to businesses in Bath, Somerset, Wiltshire and beyond.
